

Safety & Installation Instructions

v1.1-04.19

These instructions are provided for your safety in order to prevent the risk of Fire, Electric shock or Injury. It is vitally important that they are read in their entirety before installing your fitting. Please retain for future reference.

1. If you are in any doubt consult a qualified electrician as to the installation of the fitting. Install in accordance with current IEE wiring regulations. It is recommended that this fitting is installed by a qualified electrician.
2. Carefully identify where the supply cable is (and check there are no other cables in the area) to avoid damage to concealed wiring during installation.
3. Position the light where desired ensuring that there is suitable support adjacent to where you will connect to the house supply and mark position of fixing holes, before drilling appropriate holes as below.
4.
 - a. Brick or masonry: Drill holes into which the wall plugs tightly fit, then insert wall plugs.
 - b. Wood: No hole necessary (unless small pilot hole required), screws can be screwed directly into the timber.
 - c. Plaster/Cavity: Special cavity wall fittings are required, rather than provided fixings. These are widely available from good hardware or DIY store and should come with their own instructions that must be followed. It may be easier to relocate the fitting so that you screw directly into a timber joist or beam.
5. Fit the correct type and wattage of lamp (or less). Be careful not to overtighten the lamp.
6. Switch on at the fuse-board. Your light fitting is now ready for use.

Other Important Information

Switch off at mains before changing lamp(s). Never fit a lamp of greater wattage than recommended. Ensure children do not play with the light fitting. If the fitting is to be positioned in an area which can be accessed by young children we recommend installing the light with a suitable cable clip to prevent the flex from becoming a choking hazard. These are available at good hardware stores. Dispose of old lamps carefully. Never leave a fitting without a lamp in position (or someone can accidentally touch the contacts). Adjust fitting only when power to the fitting is off and has been left to cool. If the electrical flex or electrical components become damaged at any point, power to the fitting should be disconnected immediately and not operated until the damaged parts are fixed/replaced. For use in a dry, indoor environment only. Ensure the fitting does not come into contact with any liquids.

Cleaning and Maintenance

Metal finishes should only be cleaned with a soft, dry cloth. Do not use polishes or abrasives. Bone china can be cleaned by hand, using a soft damp cloth with a diluted mild detergent (nonabrasive) if necessary. Switch off power to the fitting before cleaning.

Established in 1990, Original BTC manufactures relaxed, familiar lighting for traditional and contemporary homes. All products are hand-assembled in Oxford from high quality components, produced in the UK.

Portable Pleat Wall Light

| 230V ac 50Hz | IP20 |

FW545N

FW546N

Portable Medium Pleat Wall Light, Sand & Taupe Braided Cable

Portable Large Pleat Wall Light, Sand & Taupe Braided Cable

The Portable Pleat is our most flexible wall light. A pleated bone china shade is held to the wall by a polished chromed round wall fixing. Available in two shade sizes, the light has 2.5m of cotton braided cable with an inline switch and plug. This allows the light to be positioned anywhere, without needing hard wiring.

PLEASE READ THE INSTRUCTIONS ON THE REVERSE BEFORE YOU BEGIN INSTALLING YOUR LIGHT

Hanging Instructions

This product is made from Fine Bone China; take care when handling this product during installation.

Refer to diagrams on the opposite page.

- Unscrew the two-part metal button fixing in the supplied fixing pack.
- Follow steps 2 to 4 on the back page. Ensure there is a plug socket located nearby.
- Screw the "Bracket" (D) to the wall.
- Attach the "Button" (A) to the bracket, screwing through the hole in the shade (B).
- Ensure that the shade hangs securely and the bracket is fixed securely to the wall.
- Insert the correct type of lamp, before plugging into a nearby socket.
- Your light is now ready for use.
